

[[19]] 24. (Currently Amended) The use of a zeolitic adsorbent as claimed in Claim [[14]] 18 for eliminating impurities selected from the group consisting of carbon dioxide, water, nitrous oxide, another inorganic gas, hydrocarbons and mixtures of two or more of these substances from a gas stream, in particular an air stream.

[[20]] 25. (Currently Amended) The use as claimed in Claim [[19]] 24, characterized in that the impurity is carbon dioxide.

REMARKS

The above amendments are editorial changes to put the claims of the above-identified international application in compliance with the U.S. practice.

Respectfully submitted,

BANNER & WITCOFF, LTD
